

The stickers below are used for the Droid Division Smelter droid. I printed these using a color laser printer and printed on waterslide decal paper. You can get the paper on Amazon. Here is a typical link <https://www.amazon.com/Sunnyscopa-Urethane-Transfer-Transparent-sheets/dp/B076VFHV1F>

Once you print the decals, use a razor blade knife to carefully cutout the decal inside areas as required. I use scissors to cut the outer part of the decals.

Once the decal is applied, I spray 4-5 light coats of clear acrylic. After the fifth coat, you spray heavier coats. If you use a non-acrylic spray, the decal will bubble and possibly disintegrate. I have used non-acrylic but it is a slow process that requires tons of light mist coats. I would not recommend it.

If you want to create additional items using Word (WordArt is how I created the letters), the color I use has an RGB value of 193 0 0

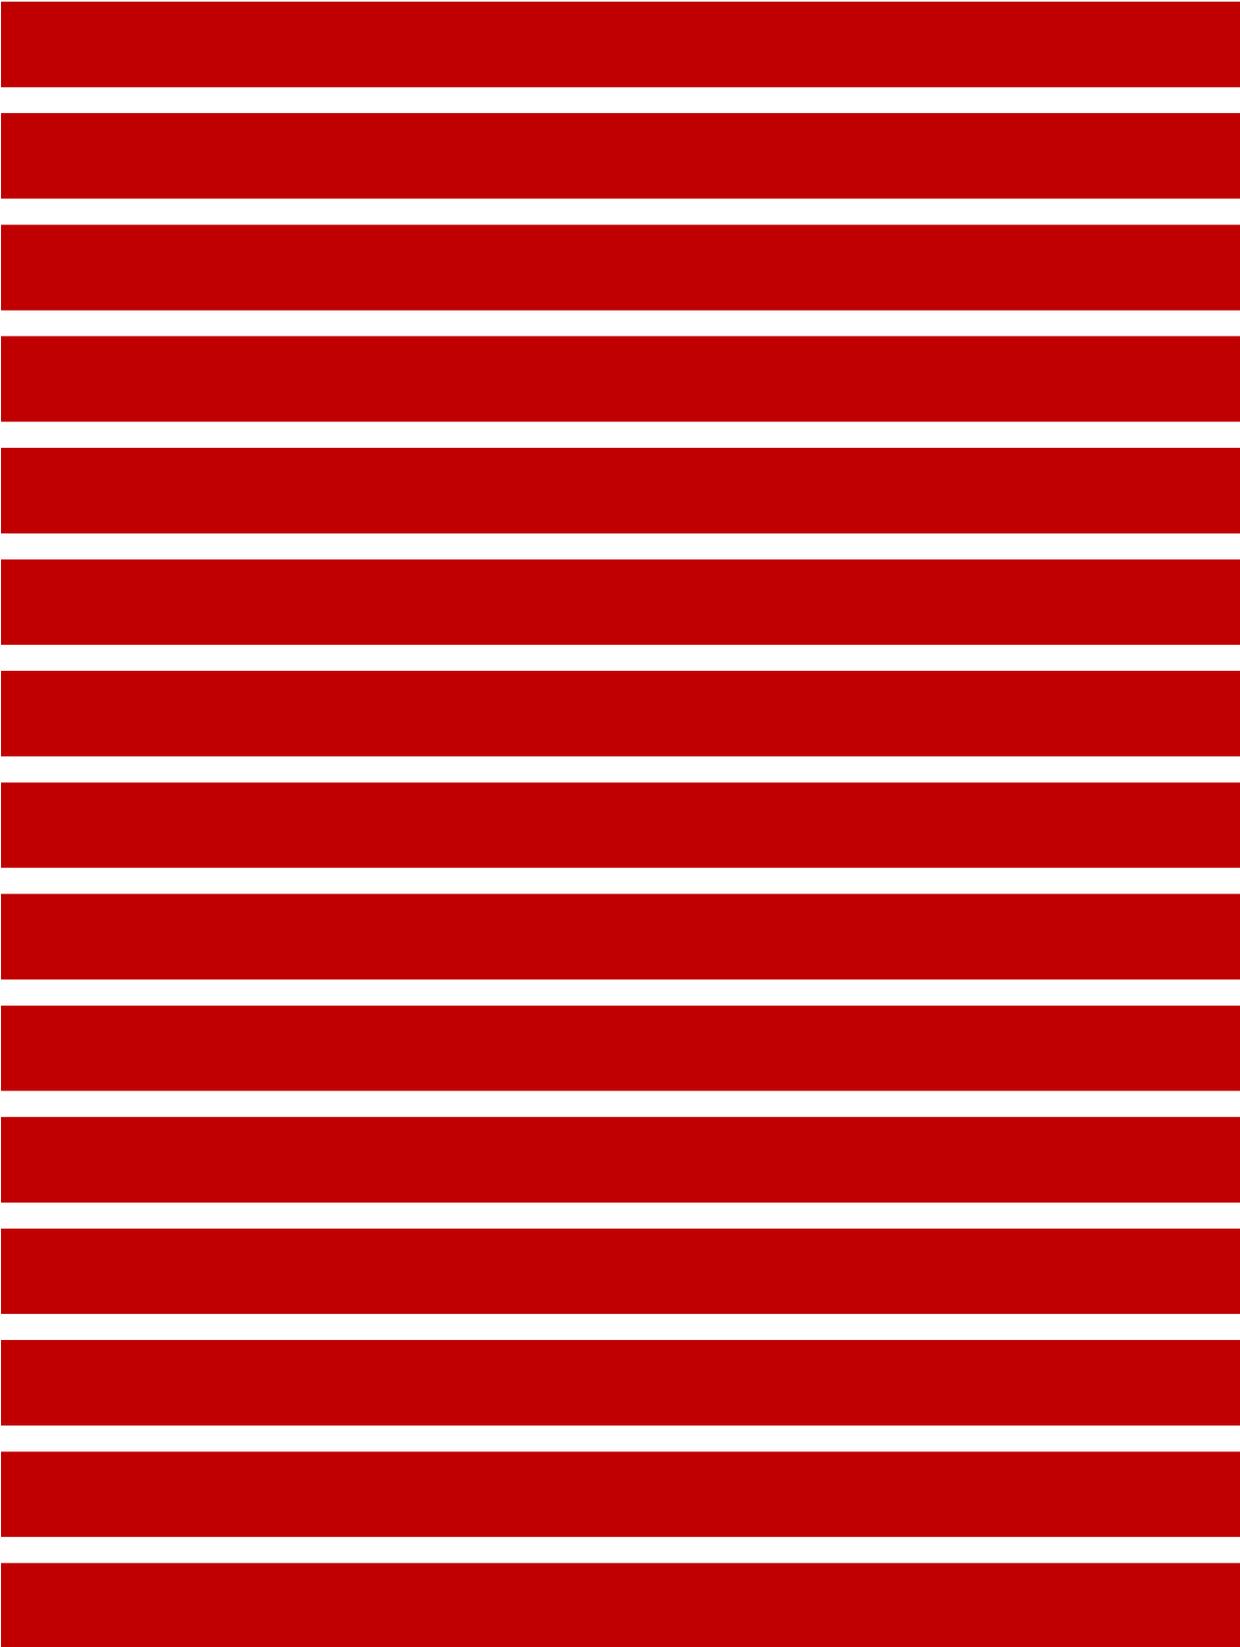

I used razor blade knife to cut out white areas. The RGB color code used is 192 0 0.

Use these for arm bands and leg bands. Cut irregular pattern as desired and trim the length.

G E

Handwriting practice area consisting of ten horizontal red bars, each separated by a white line, for writing practice.
